What are you awesome at:

I love reading research articles and conducting literature reviews, along with reading student research papers and providing feedback! I am awesome at listening and will help however I can, one of the best feelings in the world is helping someone succeed or come up with a solution to something they are stuck on. I also have experience with SPSS and APA write-ups for statistical analyses, along with using SPSS.

Personal Statement:

Reaching out and asking questions is so important when it comes to succeeding in class, and I'm more than happy to help if I can. If I don't know the answer, we can find it together! Tutoring has helped me just as much as it has helped those who I've tutored. Classes, especially research methods, can be very intimidating and sometimes you might just feel like you're not capable. That's how I felt at first, and I want to be able to help others overcome that feeling. We're all capable of so much more than we think!

PSY 448 - Psych of Women (Marin-Chollom)

What are you awesome at:

I am very good at helping people with their research papers, helping them with their topics, making sure they are doing proper APA format, correcting their grammar and structure, and giving them advice on what they need to do and what their professor is looking for whatever stage of the writing process they are in. I can also help with any specific SPSS lab questions like what the method is about, what it shows in the data, how it can be helpful, and what they need to look at for. I can help with any research method quizzes and I am sure if given the proper instructions I can help the students with whatever they need guidance with.

Personal Statement:

I am always happy to lend a hand and a shoulder to lean on to anyone that needs assistance. I look forward to helping fellow student's in whatever psych classes they are having difficulty with as we have all been there and having any support is better than no support. Putting our minds together can be better than any classmate struggling alone. I am happy to answer any questions you may have and even if I don't have the exact answer, we can figure it out together. As long as your motivated to improve and are willing to receive my aid, we can work together to get where you want to be in whatever class you need!

What are you awesome at:

I am awesome at understanding that each student learns in a different way. The key to understanding psychology is breaking down those complex theories so that they're easier to understand and apply in and out of the classroom! I specialize in using SPSS for research methods, as well as navigating literature reviews motivating you every step of the way! Once you have a good understanding of the material you learn, you'll have greater appreciation for research and psychology as a whole.

Personal Statement:

When it comes to having trouble understanding what you're learning the first time around, I've been there! Over time, I've learned to break down material so it doesn't overwhelm me, and I'm eager to do the same for others. No question is ever a dumb question, and I'd love to help students feel comfortable and confident in their studies.

What are you awesome at:

I love learning about psychology, and being able to research my own topic in 301 has been tough but extremely interesting! I am able to help walk through SPSS tests step by step for full understanding. I also love researching and helping to review sources and papers. I believe I am patient and organized in helping answer any and all questions, or I will help find the answer if I am unsure!

Personal Statement:

Research methods and many psychology classes can be overwhelming at the beginning, but taking it step by step is so important. I find that starting assignments right away so I have plenty of time to ask questions and correct my mistakes is the best way for me to get through it! It is so important to ask questions if you have them to enhance your understanding and create the best work you can!

Other courses I feel comfortable tutoring:

- PSY 330 - Abnormal Psychology (Austad)

What are you awesome at:

I do a great job at brainstorming ideas for the proposals. I also do a great job at expanding information, making research papers more detailed.

Personal Statement:

After taking a few gap years I was able to pass Research Methods with an A. The class is hard, but with proper planning and a willingness to learn, anything is possible.

What are you awesome at:

I believe my strengths in Research Methods include the writing, as well as the formulation of research ideas and execution of research projections. I believe I have a passion for helping others and have sufficient skills in teaching.

Personal Statement:

I am here to support my fellow psychology students in any way I possibly can! College throws many us many challenges, but you don't have to do it alone. Research Methods in particular is a challenge for many students, but us tutors are here to help so don't be shy!

- PSY 372 - Social Psychology (Hall)

What are you awesome at:

I excel at focusing on the small details in research methods, like proofreading for accuracy, ensuring precision in data interpretation, and presenting results clearly. My perfectionist approach helped me navigate PSY 301/302, and I especially loved the excitement of analyzing data and bringing it to life through meaningful conclusions and interpretation. I enjoy helping others tackle these details to produce their best work!

Personal Statement:

I'm a psychology major about to graduate with a passion for learning and helping others succeed. I believe everyone has their own unique way of understanding things. One of my favorite quotes is, 'You can fail at what you don't want, so you might as well take a chance on doing what you love,' by Jim Carrey, which reminds me to embrace challenges with purpose and positivity.

What are you awesome at:

I absolutely loved picking my own research topic, along with creating the process to start writing my paper. I am particularly skilled with SPSS, interpreting statistical analyses and writing in APA style. I am a great listener, patient, and love helping people try to understand topics they may have trouble in. Furthermore, I am skilled at adapting to suit different learning styles, ensuring that each student feels supported and confident in their understanding. Creating a positive and comfortable space is important to me!

Personal Statement:

Having experienced my own challenges with reaching out and feeling on the shyer side, I understand firsthand the importance of building connections and asking questions. I know how intimidating it can be to seek help, especially when you're feeling nervous or unsure. That's why I'm committed to being a supportive and approachable presence for students, creating a space where they feel comfortable asking questions and seeking guidance without hesitation. :)

What are you awesome at:

I love working together to solve any problems that might arise throughout the semester, whether it be a subject I am proficient in or not. I am passionate that the best way to learn is by doing and so I hope to make tutoring sessions focused around jumping right into concepts together. I have great patience and am always willing to hear your thoughts about what works best for you.

Personal Statement:

Plenty of classes can seem intimidating at first, especially something like research methods. I know that when I first learned about doing research, I certainly didn't see myself succeeding, never mind becoming a tutor in the subject. I really learned that with a bit of hard work and diligence, even those most daunting courses can be made manageable, and often turn out easier than you might expect!
